UFAC Fabric - Class I

*This term and any corresponding data refer to the typical performance in the specific tests indicated and should not be construed to imply the behavior of this or any other material under actual fire conditions.

Specifics

Weight: 29 oz.

Width: 54 in.

Roll Size: 30 yd.

Applications

- Automotive | RV
- Education
- Healthcare
- Office

HOSPITALITY

- Hotel | Motel | Casino
- Restaurant
- Public Spaces

MARINE

- Interior
- Exterior

RESIDENTIAL

- Interior
- Exterior

This fabric meets or exceeds these ACT performance guidelines.

*Certification Marks owned by ACT

ASSOCIATION, INC.

ACRYLIC CLEANING GUIDE

We recommend cleaning at least once a week to extend the lifespan of the upholstery, which will prevent dirt and contamination buildup and permanent staining. In the event of a spill, wipe off any excess right away with a dry white cloth or fabric, but be careful not to spread onto the remaining surface.

Clean the whole surface in a circular motion using liquid hand soap (pH neutral) and water (1 part soap to 9 parts water). Check the Approved Cleaners guide for recommended cleaning products. Wipe with a clean damp cloth to get rid of any excess soap. Repeat as needed and then let dry.

Once a month, you can use a soft-bristle brush for a deeper cleaning. Remember, light colors need more care, more often.

Note: The cleaning products recommended were used in a laboratory setting. Spradling Group® has no relationship with the manufacturers of those cleaning products.

For Color Transfer

Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colors. This phenomenon is increased by humidity and temperature and is irreversible. Please check compatibility when using this product in combination with painted or varnished surfaces.

**Disinfectants

In addition to cleaning, healthcare facilities maintain disinfecting regimens to reduce the spread of infections. There are a wide variety of available biocides that include bleaches, peroxides and quaternary ammonium products, among others. They should always be used at the recommended dilution; never in concentrated form. To prolong the life of coated fabrics, the disinfectants should be rinsed off after each use. It should be noted that misuse of disinfectants is the major source of surface deterioration. Spradling International, Inc.® continually evaluates cleaners/disinfectants, and a list of those tested can be found on our website.

Abrasion test results exceeding ACT Performance Guidelines are not an indicator of product lifespan. Multiple factors affect fabric durability and appearance retention.
