

PF Part Numbers

At Miami Corporation, we are committed to providing high-quality fabrics while adapting to industry advancements and regulatory changes. As part of this effort, we are transitioning our Awning and Marine-grade fabrics to a new finish that aligns with evolving environmental and safety standards.

What This Means for You

During this transition, you will see some of the Awning and Marine-grade fabric part numbers you frequently order will now end in "PF". This designation simply indicates that the fabric features this new finish.

For example:

- Previous Part Number: T24-60 (Black 60" Tempotest Awning/Marine)
- Part Number with New Finish: T24-60PF (Black 60" Tempotest Awning/Marine)

You will see this naming convention applied across several of our fabric lines. Whenever a part number ends in "PF," it signifies that the product now features the latest-generation finish.

We appreciate your continued business and support during this transition. If you have any questions about these changes, please don't hesitate to contact us.
